

Advanced illness and frailty exclusions

UnitedHealthcare Community Plan of Arizona

The National Committee for Quality Assurance (NCQA) allows additional exclusions to HEDIS® measures for patients with advanced illness and frailty.

NCQA implemented exclusions for select measures designed for a general adult population which may not always be appropriate for those with limited life expectancy or advanced illness and frailty.

Members who are age 66 or older as of Dec. 31 of the measurement year can be excluded from:

- Breast cancer screening (BCS-E)
- Controlling high blood pressure (CBP)
- Glycemic Status Assessment for Patients with Diabetes (GSD)

Exclusion criteria

Members must meet both of the following frailty and advanced illness criteria to be excluded:

- **Advanced illness:** Indicated by one of the following:
 - At least 2 diagnoses of advanced illness on different dates of service during the measurement year or year prior. Do not include claims where the advanced illness diagnosis was from an independent lab (POS 81).
 - Dispensed dementia medication donepezil, donepezil-memantine, galantamine, rivastigmine or memantine
- **Frailty** is reported in the measurement year and is indicated by:
 - Two indications of frailty on different dates of service during the measurement year

Use of HEDIS approved ICD-10-CM, CPT® and HCPCS codes can substantially reduce medical record requests for HEDIS data collection and improve HEDIS measure rates.

The following list of advanced illness and frailty codes count toward these exclusions.
