

Medical Records Documentation Used for Reviews: Community Plan

These guidelines list medical records documentation used and which may be required, when applicable for reviews. This content is developed using the clinical criteria in UnitedHealthcare medical policies in conjunction with the guidance provided by UnitedHealthcare physicians and pharmacists with experience in reviewing service requests for coverage. This medical record documentation content was developed in an effort to decrease the need for repeated requests for additional information and to improve turnaround time for coverage decisions.

We reserve the right to request more information, if necessary. Medical record documentation content used for case review(s) may vary among various UnitedHealthcare Community Plans.

This content is provided for reference purposes only and may not include all services. Listing of a service in these guidelines does not imply that it is a covered or non-covered health service. Benefit coverage for health services is determined by the federal, state, or contractual requirements, and applicable laws that may require coverage for a specific service. Medical records documentation may be required to assess whether the member meets the clinical criteria for coverage but does not guarantee coverage of the services requested.

These guidelines are the property of UnitedHealthcare and unauthorized copying, use, or distribution of this information is strictly prohibited. These guidelines are regularly reviewed, updated, and subject to change.
