Prior authorization <u>is not</u> required for emergency or urgent care. Out-of-network physicians, facilities and other health care professionals must request prior authorization for all procedures and services.

Prior authorization <u>is</u> required for elective services. It's the physician's responsibility to obtain relevant prior authorization. However, the facility must verify that coverage approval is on file before performing a service. Payment may be denied for services rendered without prior authorization. All final decisions concerning coverage and payment are based on the plan, member eligibility, the member's benefits, the health care professional's contract and applicable state law.
