Individual Health Record[™] (IHR)

Patient Summary tab

Provides a single, unified picture of an individual's health information accumulated from a variety of sources. UnitedHealthcare member health care information is continually being added to IHR, so all historical information may not be immediately available. This overview describes the Patient Summary items.

User notes

The IHR is a patient-level record, not a population health tool.

The IHR reflects data available to UnitedHealthcare at a point in time and may not reflect all data that is available.

Patient data may be limited by patient-imposed restrictions or Sensitive Data Class (SDC) restrictions.

Care Team – Practitioners

Displays a list of practitioners that have been assigned to the individual. The list includes each practitioner's name and specialty.

Immunizations

Displays a list of all immunizations/vaccinations given to a member. This list is used as a historical reference and works with the Health Goals tab to display when members are due for an immunization.

Test/Exams/Assessments

Displays a list of the patient's health events (e.g., tests, surgeries, exams) and assessments.

Medications

Displays a list of medication(s) prescribed for an individual. This portlet reflects both current and historical medications ordered and/or filled by the individual. It can serve as a basis for reconciling recently added medications.

Care Team – Organizations

Displays a list of organizations involved in the care of a patient. Up to 5 organizations will display in the mini portlet.

Visit History

Displays a list of visit-related events for the patient. In the Vital Signs mini portlet, a trend graph and up to 10 visit services are displayed, sorted by the start date.

Surgical History

Displays an individual's list of surgical procedures. Surgical and invasive procedures are grouped together. Some surgical procedures may be found in the Tests/Exams section.

Health Conditions

Summarizes all disease-related conditions and injury-related conditions across all available data sources based on the most reliable information received.
