

UnitedHealthcare Pharmacy Clinical Pharmacy Programs

Program Number	2024 P 3000-16
Program	Step Therapy
Medication	Repository Corticotropins - Acthar Gel [®] (repository corticotropin injection), Purified Cortrophin Gel [™] (Repository corticotropin injection USP)
P&T Approval Date	5/2012, 04/2013, 2/2014, 5/2014, 5/2015, 9/2016, 9/2017, 9/2018, 9/2019, 9/2020, 10/2021, 3/2022, 3/2023, 3/2024
Effective Date	6/1/2024

1. Background:

Acthar Gel® (repository corticotropin injection) is an adrenocorticotropic hormone (ACTH) analogue that is Food and Drug Administration (FDA) indicated for:

- **Infantile Spasms:** As monotherapy for the treatment of infantile spasms in infants and children under 2 years of age.¹
- Multiple Sclerosis: For treatment of acute exacerbations of multiple sclerosis in adults. Controlled clinical trials have shown Acthar Gel to be effective in speeding the resolution of acute exacerbations of multiple sclerosis. However, there is no evidence that it affects the ultimate outcome or natural history of the disease. ¹

Per labeling, it is suggested that Acthar may be used in the following conditions, however, it is not indicated for them:

- **Rheumatic Disorders:** As adjunctive therapy for short-term administration (to tide the patient over an acute episode or exacerbation) in: psoriatic arthritis, rheumatoid arthritis, including juvenile rheumatoid arthritis (selected cases may require low-dose maintenance therapy), ankylosing spondylitis. ¹
- Collagen Diseases: During an exacerbation or as maintenance therapy in selected cases of: systemic lupus erythematosus, systemic dermatomyositis (polymyositis).¹
- **Dermatologic Diseases:** Severe erythema multiforme, Stevens-Johnson syndrome. ¹
- Allergic States: Serum sickness. 1
- **Ophthalmic Diseases:** Severe acute and chronic allergic and inflammatory processes involving the eye and its adnexa such as: keratitis, iritis, iridocyclitis, diffuse posterior uveitis and choroiditis, optic neuritis, chorioretinitis, anterior segment inflammation. ¹
- Respiratory Diseases: Symptomatic sarcoidosis.¹
- Edematous State: To induce a diuresis or a remission of proteinuria in the nephrotic syndrome without uremia of the idiopathic type or that due to lupus erythematosus. ¹

Purified Cortrophin Gel[™] (Repository corticotropin injection USP) is an adrenocorticotropic hormone (ACTH) analogue indicated for:

- **Rheumatic disorders:** As adjunctive therapy for short-term administration (to tide the patient over an acute episode or exacerbation) in: Psoriatic arthritis. Rheumatoid arthritis, including juvenile rheumatoid arthritis (selected cases may require low-dose maintenance therapy). Ankylosing spondylitis. Acute gouty arthritis.⁵
- **Collagen diseases:** During an exacerbation or as maintenance therapy in selected cases of: Systemic lupus erythematosus. Systemic dermatomyositis (polymyositis).⁵
- **Dermatologic diseases:** Severe erythema multiforme (Stevens-Johnson syndrome). Severe psoriasis.⁵
- Allergic states: Atopic dermatitis. Serum sickness.⁵

- **Ophthalmic diseases:** Severe acute and chronic allergic and inflammatory processes involving the eye and its adnexa such as: Allergic conjunctivitis. Keratitis. Iritis and iridocyclitis. Diffuse posterior uveitis and choroiditis. Optic neuritis. Chorioretinitis. Anterior segment inflammation.⁵
- Respiratory diseases: Symptomatic sarcoidosis.⁵
- **Edematous states:** To induce a diuresis or a remission of proteinuria in the nephrotic syndrome without uremia of the idiopathic type or that due to lupus erythematosus.⁵
- Nervous system: Acute exacerbations of multiple sclerosis.⁵

In cases where conditions are corticosteroid-responsive, corticotropin has limited therapeutic value because corticosteroid therapy is considered the treatment of choice.^{2,6}

Clinical trials comparing adrenocorticotropic hormone (ACTH) and methylprednisolone (MP) in treatment of acute exacerbation in multiple sclerosis have either shown no difference between treatments³ or have shown that the MP cohort had a more rapid or greater improvement in treatment of the acute exacerbation as measure by the Kurtzke Disability Status Scale (DSS).⁴

Coverage will be provided for members who meet the following criteria.

2. Coverage Criteria^a:

A. Infantile Spasms (i.e., West Syndrome)

- 1. **Acthar Gel and Purified Cortrophin Gel** will be approved based on **both** of the following criteria:
 - a. Diagnosis of infantile spasms (West Syndrome)

-AND-

b. Patient is less than 2 years of age

Authorization will be issued for 12 months.

B. Opsoclonus-Myoclonus Syndrome (i.e., OMS, Kinsbourne Syndrome)

- 1. **Acthar Gel and Purified Cortrophin Gel** will be approved based on the following criterion:
 - a. Diagnosis of opsoclonus-myoclonus syndrome (OMS, Kinsbourne Syndrome)

Authorization will be issued for 12 months.

C. Other Conditions

- 1. Acthar Gel and Purified Cortrophin Gel will be approved based on the following:
 - a. History of failure, contraindication, or intolerance to treatment with corticosteroids

Authorization will be issued for 12 months.

^a State mandates may apply. Any federal regulatory requirements and the member specific benefit plan coverage may also impact coverage criteria. Other policies and utilization management programs may apply.

3. Additional Clinical Rules:

- Supply limits and/or Notification may be in place.
- Notwithstanding Coverage Criteria, UnitedHealthcare may approve initial and reauthorization based solely on previous claim/medication history, diagnosis codes (ICD-10) and/or claim logic. Use of automated approval and re-approval processes varies by program and/or therapeutic class.

Program	Step Therapy - Repository Corticotropins - Acthar Gel (Repository corticotropin injection), Purified Cortrophin Gel (Repository corticotropin injection USP)	
Change Control		
2/2014	Annual review with no change to coverage.	
5/2014	Review to add to cycle with other programs. No change to criteria.	
	Updated background.	
5/2015	Annual review with no change to clinical coverage.	
10/2015	Administrative update. Added Maryland Continuation of Care.	
7/2016	Added Indiana and West Virginia coverage information.	
9/2016	Annual review. No change to clinical coverage. Updated references.	
11/2016	Administrative change. Added California coverage information.	
9/2017	Annual review. Updated state mandate language.	
9/2018	Annual review. No changes to criteria.	
9/2019	Annual review. No changes to criteria. Updated references.	
9/2020	Annual review. No changes to coverage criteria. Removed "H.P." from	

	name per package insert.
10/2021	Annual review. No changes to coverage criteria. Updated references.
3/2022	Added Purified Cortrophin Gel to program with same coverage criteria as Acthar Gel. Updated program name, background and references.
3/2023	Annual review with no changes. Updated references.
3/2024	Annual review with no changes to criteria. Updated references.
