

CommunityCare: Customize and view your member roster as often as you like

CommunityCare is our integrated, secure, web-based clinical care coordination platform that lets you review and share vital information with the member's care team.

Choose relevant roster data

- See a full list of members or just those added in the last 30 days
- Customize the data you export

Get clinical updates

- Find out which members were admitted or discharged from an inpatient facility
- Learn which members visited an emergency room
- Examine plans of care and health assessments for most Medicaid and Medicare Special Needs Plans members
- Enter plan notes and view notes history for some plans

See HEDIS performance measures

- Get HEDIS® information for your member population
- Review quality measures that haven't been addressed or are in progress
- Explore quality measure lists and measure descriptions
- Compare adherent vs. non-adherent measures and target vs. gaps to target

Find CommunityCare on UHCprovider.com

Sign in to the [portal](#), then select Clinical & Pharmacy, then UnitedHealthcare CommunityCare.

Want to learn more?

Go to the UnitedHealthcare Provider Portal > Education and Training > Digital Solutions Training and Guides and scroll down to "Clinical-Related Tools" to access the [CommunityCare Provider Portal User Guide](#).

We're here to help
